

## Brownmed to introduce Three New Products Harnessing the Power of Vibration Therapy

Products may provide relief to those who suffer from osteoarthritis, fibromyalgia, migraines, acute injury or cramping.

**August 4, 2014** – Pain in your joints and muscles can limit your ability to enjoy many daily activities, whether it is the result of a chronic condition or from acute injury. If you experience this discomfort, you may want try vibration therapy.

This Fall, Brownmed will introduce three new, patented and patent-pending products under the <u>Intellinetix</u> brand that harness the power of vibration therapy to help relieve arthritis pain, joint swelling, headaches and more. The new products, which are scheduled for an early October release, are <u>Vibrating Knee and Elbow Wrap</u><sup>®</sup>, <u>Vibrating Shin and Calf Wrap</u><sup>®</sup> and <u>Vibrating Pain Relief Mask</u><sup>TM</sup>.

Vibration therapy works by stimulating muscles and ligaments to increase blood circulation. Clinical studies on whole body vibration therapy have shown that it can help reduce pain and inflammation as well as improve joint flexibility and strength. Each new Intellinetix product seeks to take the proven benefits of whole body vibration and apply them to specific parts of the body to provide targeted relief.

Rechargeable and easy to use, the vibration therapy can be turned on and off at your leisure with a push of a button. The maximal duration of pain relief was found when vibratory stimulation lasted 25-45 minutes. However, one <u>study</u> completed earlier this year indicates that even five minutes of low level vibration therapy was as effective as a 15 minute massage at reducing muscle soreness and recovery time after strenuous exercise.

Both the Vibrating Knee and Elbow Wrap and the Vibrating Shin and Calf Wrap will have an initial MSRP of \$99.99. The MSRP for the Vibrating Pain Relief Mask is \$49.99, making it an attractive gift option for you or a loved one this holiday season.
