

# Vibrating Gloves

**Intellinetix is the first line of products to combine targeted vibration therapy in a portable device at an affordable cost.**

Vibration therapy works in two ways. First, the gentle vibrations help stimulate muscles and ligaments to increase blood circulation. Second, the vibrations serve as a sensory distraction, disrupting pain signals that are constantly traveling from your body to your brain and replacing them with gentle, massaging sensations. Best of all, with vibration therapy, there is no feeling of electric shock commonly associated with TENS units.

Clinical studies on whole body vibration therapy have shown that it can help reduce pain and inflammation as well as improve joint flexibility and strength. Over the years, vibration therapy has been used in clinics, hospitals, and even by NASA as an option to maintain bone density for astronauts.

Rechargeable and easy to use, Intellinetix products represent intelligent innovation – taking the proven power of whole body vibration and targeting the source of pain with localized, portable vibration therapy. Whether it's a chronic condition such as arthritis, or an acute injury, Intellinetix now has products that may offer relief to your hands, knees, elbows or shins. There's even an option that helps eliminate the pain of migraines or severe headaches.

Available without a prescription, Intellinetix products represent an alternative treatment without the pills.
